

ANNUAL NOTICES

Asbestos Notification

Hobson Public School has implemented an asbestos management plan approved by the Montana Department of Public Health. The plan includes information about building inspections and our actions in response to the presence of asbestos-containing building materials as required by the Asbestos Hazard Emergency Response Act. A copy of the plan is available for inspection at the school building during normal business hours. As requested, we will survey all asbestos-containing materials at least every six months. Accredited inspectors will inspect every three years.

We are confident that the proper management of asbestos-containing building materials will protect human health and the environment. Our asbestos program coordinator is Amanda Barnes. Please email Superintendent Hugo Anderson at hugo.anderson@hobson.k12.mt.us or call 406 423-5483 if you have any concerns regarding asbestos.

Water quality

A water-quality confidence report for Hobson School is posted at the school and is also available upon request. The report is for the previous year and may be obtained by emailing hugo.anderson@hobson.k12.mt.us or calling 406 423-5483.

Environmental Safety

Hobson School is committed to providing students and staff with the safest and best environment possible. Some ways we accomplish this include working with state and federal regulators, such as the Montana Department of Public Health, the Montana Department of Natural Resources, and the Environmental Protection Agency, to maintain compliance with established requirements and guidelines. We attend training and workshop sessions regarding environmental issues and stay current with publications and regulations. We also provide training to our staff. If you have questions about asbestos, radon, lead, water-quality issues, pesticides, handicap access or any environmental issues, please contact hugo.anderson@hobson.k12.mt.us at or 406 423-5483.
