Hobson School

Hobson Schools has an asbestos inspection annually in compliance with state and federal laws. To review these inspection reports, contact Facilities Manager Mike Woods.

In short, all of the asbestos used for any pipe insulation in the basement, boiler room, or elsewhere has been abated years ago thanks to a grant that Mrs. Bergstrom wrote. There is a great deal of 9” tile throughout the building that is regularly inspected by Mike Woods, David Pace, and Mr. Tharp to ensure that it does not have any cracks or damage. As long as it is either covered with carpet or sealed with a wax coating, it poses absolutely no hazard what-so-ever. The only potential risk would include if it were to be damaged and in a ‘friable’ state where dust particles would become airborne.
